ECCI Project Number: 4509-3024

April 2026

Prepared for:
CITY OF LITTLE ROCK

We declare to the best of our professional knowledge and belief, we meet the definition of *environmental professionals* as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the *subject property*. We have developed and performed all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision according to a system designed to assure that qualified personnel properly gather and evaluate the information submitted. The information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information (Regulation 32.607).

1.0 Executive Summary

ECCI performed a Phase I Environmental Site Assessment (ESA) for The City of Little Rock. This Phase I ESA was performed on a lot located at 10702 Breckenridge Drive. This Phase I ESA was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527 - 21, “*Environmental Site Assessments: Phase I Environmental Site Assessment*,” hereinafter referred to as the Standard. Any exceptions to, or deletions from, the Standard are discussed in Section 9.0 of this report. This report will serve to summarize the work performed by ECCI professionals as part of this project.

The purpose of this Phase I ESA on these parcels of real estate is to investigate the presence of the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. This report is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice.

While use of this Phase I ESA is intended to constitute all appropriate inquiries, it is not intended that its use be limited to that purpose. This report is intended primarily as an approach to conducting an inquiry designed to identify recognized environmental conditions (RECs) in connection with a property. This practice is intended to reflect a commercially prudent and reasonable inquiry.

During the course of this project, ECCI performed a site reconnaissance, reviewed federal, state, and local records, and interviewed persons familiar with the property to ascertain historical use of the property and surrounding areas. ECCI did not observe any recognized environmental conditions, controlled environmental conditions or historical recognized environmental conditions on the subject property.

The property was developed as a single-family home. The home was heavily damaged in the March 2023 tornado and has since been demolished and removed

from the property. Information on the findings and conclusions can be found in Table 1.1 below. Further descriptions and a summary of the site's characteristics can be found in section 6.0.

Table 1.1 – Summary of Findings, Opinion and Conclusions

FINDINGS	SUMMARY
10702 Breckenridge Drive	The property was developed into a single-family home. The home was damaged by a tornado and then demolished and removed.
	OPINION AND CONCLUSION: ECCI did not observe any recognized environmental conditions, controlled recognized conditions or historic recognized conditions.

ECCI assumes that information provided by persons interviewed for this project is correct. The investigation is limited to visually observable environmental conditions present on the property at the time of the site inspection. Whenever possible, adjoining properties were visually inspected. This report and all work performed in conjunction with this report is for the exclusive use of The City of Little Rock and their agents or assigns. Other entities or individuals may only rely on this report with the express written consent of The City of Little Rock and ECCI.

2.0 Introduction

2.1 Purpose of the Phase I Environmental Site Assessment

ECCI was authorized by The City Little Rock to perform a Phase I ESA on the property located 10702 Breckenridge Drive located in the western portion of Little Rock, Pulaski County, Arkansas. The subject property consists of one 0.31-acre parcel. The location of the subject property is illustrated on Figures 3-1 and 3-2. Photographs taken during the July 26, 2026, site visit are provided in Appendix B. The subject property has been used historically for single family housing. There is no longer a home on the property. The property surrounding the building is maintained as lawn, as well as scattered trees.

The purpose of this Phase I ESA is to identify and describe past uses of the property which involved hazardous substances or petroleum products and existing or potential recognized environmental conditions, controlled recognized environmental condition, or historical recognized environmental conditions (as defined by ASTM Practice E 1527-21) in connection with the Property. A **Recognized Environmental Condition** (REC) is defined in the Standard as (1) “the presence of hazardous substances or petroleum products in, or at the subject property due to a release to the environment, (2) the likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” A **controlled recognized environmental condition** is defined as a “recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.” A **historical recognized environmental condition** is defined as a “previous release of hazardous substances or petroleum products affecting the subject property that has been that has addressed to the

satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority or authorities without subjecting the subject property to any controls.” A *de minimis* condition is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. *De minimis* conditions are not Recognized Environmental Conditions.

2.2 Detailed Scope of Services

The Standard identifies four (4) component parts of a Phase I ESA. The components are site reconnaissance, records review, interviews, and evaluation and report preparation. The scope of work developed for this project as defined by the four (4) components is as follows:

2.2.1 Site Reconnaissance

Mr. Jeremy Stehle with ECCI conducted a site visit on the subject property located in the western portion of Little Rock, Arkansas on July 26, 2026. The purpose of the visit was to visually and physically observe the property and any structures located on the subject property. During the visit, the environmental professional noted information about the general conditions and site setting of the subject property. The objective of the site visit was to obtain information to identify and describe past uses of the property which involved hazardous substances or petroleum products and to identify potential Recognized Environmental Conditions associated with the property.

2.2.2 Records Review

A review of reasonably ascertainable federal and state records was performed to help identify Recognized Environmental Conditions in connection with the property. ECCI obtains federal and state records from Environmental Data Resources (EDR) in Southport, Connecticut. Standard environmental record sources reviewed included:

- National Priorities List (NPL);
- CERCLIS List;
- CERCLIS NFRAP Site List;
- RCRA CHEALEYACTS;
- RCRA Transportation, Storage, and Disposal Facilities;
- RCRA Generators List;
- Federal institutional control/engineering control registries;
- Federal ERNS List;
- State and tribal lists of hazardous waste sites identified for investigation or remediation;
- Emergency Response Notification System List;
- State Remedial Action Site List;
- State and Tribal Landfill List;
- State and Tribal Voluntary Cleanup Sites;
- State and Tribal Brownfields Sites;
- State and Tribal Registered and Leaking Storage Tank Lists;
- Local Brownfields Lists;
- Local Lists of Landfills/SWDS; and
- Registered Storage Tanks.

ECCI also reviewed the current United States Geological Survey (USGS) Topographic Maps. This is a standard source for information regarding the physical setting of the property. Historical use information was obtained by reviewing available standard historical sources, which included aerial photographs. Sanborn Fire Insurance Maps and City Directories were accessed for review through EDR.

2.2.3 Interviews

In order to obtain information about the current and historical use of the property and to attempt to identify any recognized environmental conditions, ECCI interviewed Ms. Lois Thomas (Owner) with a questionnaire. Information from this interview is summarized in Section 7.0 of this report.

2.2.4 Evaluation and Report Preparation

The final report for this project was prepared by Environmental Professionals and reviewed for technical quality by an Environmental Professional as defined by the Standard. The report includes all documentation to support the analysis, opinions, and conclusions found herein. The

documentation is of sufficient detail to reconstruct all research at a later date, if necessary, as required by the Standard.

2.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM Standard Practice ASTM E 1527-21 to ensure that methodologies used constitute appropriate inquiry into the prior uses of the property consistent with good commercial and customary practice in order to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with a property. Performance, in accord with these standards, is intended to reduce but not eliminate uncertainty with respect to the potential for Recognized Environmental Conditions associated with a property. This report is designed to satisfy the requirements for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability as defined in 42 USC 9601(35) B. ECCI assumes that information provided by persons interviewed for this project is correct.

2.4 Limitations and Exceptions

The information presented and conclusions made in this report are based upon the site inspection, interviews and records review performed by ECCI. The assessment is limited to visually observable environmental conditions present on the properties at the time of the site inspection. Specific assessments of the following potential environmental conditions are excluded from this project: asbestos, lead-based paint, potential radon gas hazards, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents and mold.

2.5 Special Terms and Conditions

The scope of work provided by ECCI and approved by the client contained no special terms and conditions related to the investigation.

2.6 User Reliance

The report may be distributed and relied upon by City of Little Rock and their successors and assigns. Reliance on the information and conclusions presented in this report by any other party(ies) is not authorized by ECCI.

3.0 Site Description

3.1 Location and Legal Description

The subject property is currently vacant with a total of approximately 0.31-acres in the western portion of Little Rock, Arkansas. A legal description for the property was not provided by the User. The general location of the property is depicted in Figure 3-1, Topographic General Location Map and the site layout can be seen in Figure 3-2, Aerial Photograph of General Site Layout with Adjoining Properties.

 Approximate Boundaries - Not to Scale

3.2 Site and Vicinity General Characteristics

This property is located in the western portion of the city of Little Rock. The subject property was developed with a single-family home. A tornado in March of 2023 heavily damaged the structure and it was removed down to the foundation. The surrounding properties are primarily residential. There are some commercial offices, retail and automotive dealerships lots to the north and west.

3.3 Current Use of the Property

The property is currently vacant. The single family home that was once on the property has been removed.

3.4 Descriptions of Structures, Roads, Other Improvements on the Site

There is a concrete driveway that extends into the property from Walnut Valley Drive.

3.5 Site Utilities

All utilities are available from the local providers.

3.6 Current Use of the Adjoining Properties

The properties to the south, west and north are residential homes. The property to the east is the Access School.

4.0 User Provided Information

4.1 Title Records

ECCI was not provided with documentation of the title history of the subject property for this Phase I ESA. The extent of the subject property was defined by the User. According to the User questionnaire and the website Arcountydata.com the property has been owned by the group ALLR LLC since January 2026. Prior to ALLR LLC the property was owned by Access Group Inc. from May 2023 until January 2026. The property was owned by the Alewine family or family trust from November 2011 until May of 2023. The property was owned by Jerry Morris from February 2008 until November of 2011. Prior to that Jacqueline Walker owned the property.

4.2 Environmental Liens or Activity and Use Limitations

No records of environmental liens or activity and use limitations were provided to ECCI by the User.

4.3 Specialized Knowledge

The User indicated that they have no specialized knowledge about the subject property.

4.4 Commonly Known or Reasonably Ascertainable Information

The User did not have commonly known or reasonably ascertainable information about the subject property that is material to recognized environmental conditions in connection with the subject property.

4.5 Relationship of the Purchase Price

The User indicated that the purchase price of the property is for fair market value.

4.6 Owner, Property Manager, and Occupant Information

ALLR LLC has currently owns the subject property. ALLR has owned property for approximately seven months.

4.7 Reason for Performing Phase I

ESAs are generally requested to qualify for a landowner liability protection under CERCLA. These protections include the following:

- **Bona Fide Prospective Purchase Liability Protection** a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after April 11, 2002.
- **Contiguous Property Owner Liability Protection** - a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the property and did not know or have reason to know that the property was or could be contaminated by a release or threatened release from the contiguous property. The all-appropriate inquiries must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the contiguous property owner liability protection.
- **Innocent Land Owner Defense** – a person may qualify as one of three types of innocent landowners: (i) a person who “did not know and had no reason to know” that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who “acquired the facility by inheritance or bequest.” To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all-appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense.

This Phase I ESA and report was prepared by ECCI at the request of City of Little Rock, who will use the report to use purchase the property and to qualify for as a bona fide prospective purchaser.

5.0 Records Review

5.1 Standard Environmental Record Sources

ECCI obtains information regarding federal environmental databases from EDR in Southport, Connecticut. These databases contain site-specific information regarding a variety of potential environmental concerns including hazardous waste activities, the operation of aboveground and underground storage tanks, remediation investigations performed by the EPA, and other items. During this search, numerous databases are reviewed to identify sites which are in close proximity to the property and which may present a potential environmental risk to the property. The databases searched are detailed in the EDR Radius Map Report that presents information identifying any facilities found in the ASTM search radius, including the subject property. For this Phase I ESA, the EDR Radius Map Report identified five (5) sites located within the appropriate search distances for the specific records types searched. Table 5.1 below lists the details of three sites closest in proximity to the subject property. None of the sites listed in the EDR Radius Report pose a threat to the subject property. The complete list of sites identified are included in the EDR Radius Report in Appendix C.

The EDR Zip Code Scan Report identifies sites in three ways; mapped sites, orphan sites, and zip code scan sites. The EDR Zip Code Scan Report identified other sites that were not mapped due to poor, duplicate, or inadequate addresses. ECCI has made a reasonable effort to reconcile this information utilizing resources which ECCI currently has available to determine if any of the sites located in Zip Code Scan Report were located within the approximate minimum search distances. The sites on the Zip Code Scan Report do not pose a risk to the property. There are no orphan sites listed in the EDR documentation. A copy of the EDR Radius Map Report detailing all databases searched is included in Appendix C.

Table 5.1 – Sites Identified in Records Review

Map and Zip Code Identified Sites	Database Information
10710 Breckenridge Drive Subject Property Little Rock, AR ERNS	1. ERNS – A call was placed to the NRC for a transformer spill on the property. The transformer spill was determined to be non-PCB containing oil of approximately 20 gallons. The March 31, 2023, tornado blew the power pole over damaging the transformer. A cleanup was performed. 2.
Little Rock Fire Station #09 1324 North Shackleford Little Rock, AR 72204 West -northwest 0.205 Miles Higher Elevation 454 Feet UST Finder US Brownfields FINDS LTANKS UST Permits	1. UST Finder- This site is listed on the underground storage tank mapping database that tracks the locations of USTs. The tank is listed as a 2,500-gallon tank used to store diesel fuel. 2. US Brownfields – This site is listed on the Brownfields list in the asbestos section. The asbestos was cleaned up. 3. FINDS - This site is listed on the database that tracks environmental databases. The site is listed with a Brownfield program action. 4. LTANKS – A failed tightness test in April of 1992 was the method of discovery. A release was confirmed. A letter of no further action was sent June 2, 1992. 5. UST – The site has three tanks listed as permanently out of service. The largest tank was 2,500 gallons. The tanks store diesel and gasoline. 6. Permits - This site is listed on the DEQ database that tracks facilities with permits. This facility is listed as registered storage tank.

Map and Zip Code Identified Sites	Database Information
Doublebee's #101 10705 N Rodney Parham Little Rock, AR 72212 North 0.309 Miles Higher Elevation of 463 Feet LTANKS UST Financial Assurance PERMITS	1. LTANKS – Water was discovered in the unleaded tank. Repairs were carried out and it was determined that there were no impacts to the environment. A Letter of no further action was sent in October of 2014. In April 2020 a hole was discovered in the bottom of the tank. A tightness test failed. Assessment was completed in April 2022. The LUST case was closed in May of 2022. 2. UST – The site is listed with four tanks in use. The tanks have capacities of 6,000 and 8,000 gallons and store gasoline and diesel. There two other tanks listed as temporarily or permanently out of service. The tanks have capacities of 550 and 10,000 gallons. These tanks store used oil and diesel. 3. Financial Assurance – This site is listed with financial assurance on file with DEQ for the USTs. 4. Permits – This site is listed on the DEQ database that tracks sites with environmental
Colony West Conoco Circle K 10200 R. Parham at Breckenridge Little Rock, AR 72207 East-northeast 0.329 Miles Higher Elevation of 426 Feet LTANKS UST FINDER RELEASE UST FINDER	1. LTANKS – This site had a spill into the creek downstream from the facility in May of 1996. PMI was contracted to clean up the spill. In October of 1989 an artesian well on the property was discovered to be flowing with a sheen. The property owner was advised to cap the well and no further action was required. In January of 2014, the waste oil tank was closed samples showed TPH above DEQ guidelines. A work plan was developed and completed. A letter of no further action was issued on 12/29/2014. In May of 2023 an inspection occurred because the site was not monitored due to tornado damage and product was discovered in the tank pit. 2. UST – The site is listed with four fuel tanks as permanently out of service. The tank capacities were 10,000 and 12,000 gallons. A permanently out of service 1,000-gallon used oil tank was also reported. 3. UST FINDER RELEASE – This site is listed on the mapping database that tracks releases from USTs. 4. UST FINDER – The site is on the mapping database that tracks UST locations.

Map and Zip Code Identified Sites	Database Information
Superstop #1040 Texaco # 29-006-0011 Maxmart #40 10100 Rodney Parham Road Little Rock, AR 72207 East 0.443 Miles Lower Elevation of 400 Feet LTANKS UST Financial Assurance UST FINDER RELEASE UST FINDER PERMITS	1. LTANKS – Gasoline was found in the submersible pump sump of tank number 1. A flex line leaked. The line was repaired and a statement of no further action was issued. 2. UST – This site has three in use tanks with capacities of 10,000 and 12,000 gallons. All three tanks store gasoline. A temporary out of service tank has a capacity of 10,000 gallons and stored gasoline. There is a 550-gallon used oil tank listed as permanently out of service. 3. Financial Assurance – This site has financial assurance for the USTs on file with DEQ. 4. UST FINDER RELEASE – This site is listed on the mapping database that tracks releases from USTs. 5. UST FINDER – The site is on the mapping database that tracks UST locations. 6. PERMITS – This site is listed on the DEQ database that tracks permits as having registered storage tanks.

5.2 Agency File Review/Other Available Records

ECCI reviewed available information for numerous sites from the Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ) online permit database. No other agency file records were reviewed associated with this Phase I report.

5.3 Fire Department

ECCI contacted the Little Rock Fire Department about any responses for fires or chemicals on the property. The Fire Department was unable to access any records for the subject property.

5.4 Health Department

ECCI also contacted the Pulaski County Health Unit of the Arkansas Department of Health regarding any responses the department has had to the property. The Environmentalist noted that there have been no responses to the subject property and no other information in the database.

5.5 Specialized Information, Prior Reports and Other Documentation

ECCI did not rely on any specialized information or any prior reports when completing the Phase I ESA.

5.6 Physical Setting Source(s)

The ASTM Standard requires that the USGS Topographic Map for the facility be reviewed as standard practice. The topographic map depicted in the radius report of the target property is the Pinnacle Mountain Quadrangle. The map is shown as Figure 3-1 of this report. According to the contour lines on the quadrangle, the subject property is located approximately 422 feet above mean sea level.

5.6.1 Surface Water Characteristics

Site observations and quadrangle contour lines indicate that the subject property generally slopes toward the north-northeast.

5.6.2 Groundwater and Soil Characteristics

Groundwater flow direction and velocity is determined by using site-specific geologic and soil strata data. Other information, such as geologic age identification, rock stratigraphic unit, and soil characteristic data is also used to determine groundwater characteristics. The general topographic gradient is to the North-northeast.

Information provided by EDR detailed one Rock Stratigraphic Unit for the area. Geologic information in the general area of the subject property is reported as being of the Paleozoic Era within the Pennsylvanian System and the Atokan and Morrowan Series Jackfork Sandstone. The Geologic Age Identification category is a stratified sequence.

According to the U.S. Department of Agriculture's (USDA) Natural Resource Conversation Service (NRCS) Web Soil Survey (WSS), there is one soil map unit, i.e., Urban Land, on the subject property. Urban land soils are classified with hydrologic group C with slow infiltration rates. The drainage class

is reported as well drained. Detailed information on soils data is presented in the EDR Radius Map Report included in Appendix C.

5.6.3 Flood Zone Map

ECCI reviewed the EDR GeoCheck report, and according to the EDR Detail Map, the property is not located within the 100-year or 500-year flood zones. The site is depicted on a FEMA Flood Plain Panel 05119C0319G.

5.7 Historical Use Information on the Property

Based upon resources reviewed, the property was cleared and used as a family home prior to 1974. The development appears to primarily be for a single-family home that was removed by the tornado in March of 2023. The property appears to have been vacant since then. ECCI utilized historical topographic maps, aerial photos, and other information from EDR and DEQ in the preparation of this report.

5.7.1 Aerial Photographs

Historical aerial photos dating back to 1937 depict the character of the site and surrounding areas. Copies of the aerial photographs received from EDR are included in Appendix D. A brief description of each aerial photograph is presented in Table 5.2 below.

Table 5.2 – Aerial Photograph Descriptions

Year	Description
1937	The subject property is depicted as wooded and undeveloped. There is a trail visible to the north of the property. There is also a road or trail near the present day location of Rodney Parham Road.
1940	The photo depicts the property similarly to the previous photos. There has been some development to the west and east of the subject property.
1943	This photo is similar to the previous photo.
1950	The subject property is still wooded and undeveloped. There are more roads visible to the north and the south.
1955	The subject property is still wooded. There is more development along Rodney Parham and to the southeast.
1960	The subject property is still wooded. Development continues to increase to the north and southeast.

Year	Description
1970	The subject property is still wooded. The neighborhood roads are visible in the area around the subject property.
1974	The subject property has been developed with a single-family home. The adjacent properties to the north and south have also been developed with homes. Neighborhoods have been developed to the west, north and south of the subject property. The Access School is visible to the east. Interstate 430 has been built to the west of the subject property. Development along Rodney Parham continues to expand.
1983	The subject and adjacent properties appear similar to the previous photo. Development along Rodney Parham corridor continues to expand.
1989	The subject and surrounding properties are similar to the previous photos. Development has been mostly completed in the area.
1994	This subject and surrounding properties appear similar to the previous photo.
2002	The subject and surrounding properties appear similar to the previous photo.
2006, 2010, 2015 and 2019	The subject and surrounding properties appear similar to the previous photo.
2023	The home on the subject property is no longer standing due to the tornado. Several homes in the surrounding area have also sustained damage.

5.7.2 Topographic Map

Historical topographic maps dating back to 1891 were available and were reviewed for this Phase I ESA. Copies of the topographic maps produced by the USGS were received from EDR. These maps can be found in Appendix D. A brief description of these maps is presented in Table 5.3 below.

Table 5.3 – Topographic Map Description

Year	Description
1891 and 1893	These maps are the Little Rock and Camp Pike 30-minute maps. The subject and surrounding properties are depicted as undeveloped. There is a trail or road depicted near the present-day Rodney Parham Road.
1943 and 1944	This map is the combination of the Pinnacle Mtn, Little Rock and Alexander 7.5-minute maps. The subject property is depicted as undeveloped. A trail or road is depicted to the north of the property. There are some developments to the north of the subject property.
1954	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-minute maps. The subject property is depicted as undeveloped. The adjacent properties are also depicted as undeveloped.

Year	Description
1961	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-mintue maps. The subject and adjacent properties are still undeveloped. Development continues to expand to the north.
1970	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-mintue maps. The subject property is depicted as undeveloped. The neighborhood streets are depicted.
1983	This map is the combination of North Little Rock 15-mintue map. The subject property and the surrounding properties are shaded red depicting development.
1986	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-mintue maps. The subject and surrounding properties are depicted in red. Development along the Rodney Parham corridor has expanded.
1994 and 1996	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-mintue maps. The subject and adjacent properties are all shaded in red.
2014, 2017, 2020 and 2024	This map is the combination of the Pinnacle Mtn, Little Rock, North Little Rock and Alexander 7.5-mintue maps. This map does not depict development; only topographic data, roads, and symbols.

5.7.3 Sanborn Fire Insurance Maps

Fire Insurance Maps have been produced for urban areas since the late 1800s and were utilized for determining fire hazards. When available, these maps are reviewed for further documentation concerning the historical use of the property and surrounding area. Sanborn fire insurance maps were not available for the subject property. A copy of the Sanborn Fire Insurance Map report from EDR is presented in Appendix D.

5.8 City Directories

City Directories are a screening tool designed to evaluate potential liability on a target property resulting from past activities at their facility and nearby sites. The City Directory Report includes a search of available city directory data at varying intervals. The City Directories Report listed addresses at various intervals between 2024 and 1973 along Breckenridge Drive. Residential, a school, and a church were the addresses listed on the report for Breckenridge. The report listed a residential address on Kings Mountain Drive from 2024 to 1980. The addresses along the section along North Shackelford Road were for residences and the Walnut Valley park and pool from 1974 to 1997. Address on Pleasant Cove were listed from 1973 to 2024. All of the Pleasant Cove addresses were residential. Addresses on Pleasant CT were available from 1973 to

2024. All of the addresses along this section of Pleasant CT were also residential. All of the addresses listed on South Shackleford were residential and were available from 1964 to 1993. The report listed only residential addresses along Walnut Valley Drive from 1973 to 2024. A copy of the City Directories report from EDR is presented in Appendix D.

5.9 Historical Use Information on Adjoining Properties

The surrounding properties were used historically for residential homes a church and a children's day care.

6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

Archival research, staff interviews, and visual site inspections were used to obtain the necessary information for preparation of this Phase I ESA. During the visual inspection, ECCI personnel used information gathered from the archival research to identify possible recognized environmental conditions. Features inspected included: ditches, drains, soils and vegetation. The visual inspection also observed adjoining properties to identify potential sources of contamination that might have migrated or could migrate onto the subject property.

6.2 General Site Setting

On July 26, 2026, Mr. Jeremy Stehle visited the subject property located on 10702 Breckenridge Drive. Any observed conditions are described below in Table 6.1. Photographs of the subject property are included in Appendix B.

6.3 Site Reconnaissance Observations

Table 6.1 identifies potential environmental concerns noted during the site reconnaissance. Discussion of any item marked in the table is presented in the following sections.

Table 6.1 – Site Reconnaissance Observations

Description	Observation		Additional Information
	Yes	No	
Hazardous Substances/Petroleum Products		X	
Storage Tanks (AST and UST)/Boilers		X	
Odors		X	
Pools of Liquid		X	
Drums		X	
Landfills		X	
Unidentified Substances Containers		X	
Potential PCB Equipment		X	
Pits, Ponds, Lagoons, and Surface Impoundments		X	
Stained Concrete, Soil or Pavement		X	
Stressed Vegetation		X	
Solid Waste		X	
Wastewater		X	
Wells		X	
Septic Systems		X	
Trenches and Sumps		X	
Drains and Pipes		X	
Hydraulic Equipment		X	
Solid Waste	X		6.3.1

6.3.1 Transformers

Two pole mounted transformers were noted on the property. One of the transformers was adjacent to Breckenridge Drive on the southeast corner. The other transformer was on a pole on the northeast corner of the property.

7.0 Interviews

The purpose of the interviews conducted during the development of the ESA is primarily to support information obtained during this project.

7.1 Interview with Historical Owner's Representative, Site Manager, Occupant

For this Phase I ESA, ECCI interviewed the Owner, Ms. Lois Thomas, ALLR LLC, Owner Representative who completed the Owner Questionnaire. The site User and Owner completed the Phase I questionnaires contacted which is located within Appendix D.

7.2 Interviews with Local Government Officials

ECCI contacted the Little Rock Fire Department and the Pulaski County Health Unit to determine if they have responded to any fires or spills onsite. The fire department was unable to access any information from the database for the subject property. The Environmentalist noted that there had been no responses to the subject property and no other information was available in the database.

7.3 Interviews with Local Utilities

The local utilities were not contacted by ECCI for this property.

7.4 Interviews with Others

ECCI interviewed Ms. Lois Thomas, owner representative of ALLR LLC. They indicated that to the best of their knowledge there has been no industrial activity on the site and that they are not aware of the historic presence of drums, fuel, oil, or hazardous materials on the site.

8.0 Findings, Opinions, and Conclusions

This ESA has been performed in accordance with ASTM “*Phase I Environmental Site Assessment Standards*” (ASTM E1527-21) for the City of Little Rock. This Phase I ESA was performed on an approximate 1.84-acre tract of land and associated buildings located at 10702 Breckenridge Drive. Any exceptions to, or deletions from this practice are described in Section 9.0 of this report.

During the course of this project, ECCI performed a site reconnaissance, reviewed federal, state, and local records, and interviewed persons familiar with the property to ascertain historical use of the property and surrounding areas. ECCI did not observe any recognized environmental conditions, controlled environmental conditions or historical recognized environmental conditions on the subject property.

The property was developed as a single-family home. The home was heavily damaged in the March 2023 tornado and has since been demolished and removed from the property. Information on the findings and conclusions can be found in Table 8.1 below. Further descriptions and a summary of the site’s characteristics can be found in section 6.0.

Table 8.1 – Summary of Findings, Opinion and Conclusions

FINDINGS	SUMMARY
10702 Breckenridge Drive	The property was developed into a single-family home. The home was damaged by a tornado and then demolished and removed.
	OPINION AND CONCLUSION: ECCI did not observe any recognized environmental conditions, controlled recognized conditions or historic recognized conditions.

8.1 Data Gaps

Aerial photo data gaps were large between available images, as much as nine years for quality photos. There were also large gaps between the topographical map intervals of up to 12 years. Data gaps were substantial for this subject property. However; ECCI does not believe the gaps would indicate the property was used for anything other than housing.

8.2 Additional Investigation

ECCI was not contracted to complete any additional investigations.

9.0 Deviations

This Phase I ESA was performed in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527 - 21, “*Environmental Site Assessments: Phase I Environmental Site Assessment*”.

10.0 Additional Services

ECCI was not contracted to perform any additional investigation or services regarding the subject property.

11.0 References

12.0 Environmental Professional Statement

Mr. Jeremy Stehle and Mr. Rod Breuer have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all of the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We declare that, to the best of our knowledge, we meet the definition of environmental *professional* as defined in §312.10 of 40 CFR Part 312. Résumés for these individuals may be found in Appendix A

APPENDIX A

Qualifications of Environmental Professionals

JEREMY STEHLE

Sr. Environmental Scientist

EDUCATION

University of Arkansas at Little Rock, Little Rock, Arkansas
Wildlife Management/Fisheries
Emphasis in Fisheries and Water Quality
Graduated May 2009

PROFFESIONAL HISTORY

ECCI, Environmental Scientist, Little Rock, AR, 2010 - Present

Arkansas Game and Fish Commission, June 2009 to March 2010

EXPERIENCE

Mr. Stehle serves as a professional environmental scientist for ECCI projects including stormwater management, oil spill control, mining water management, Clean Air Act, Clean Water Act facility compliance systems, provided fiberglass reinforced plastics (FRP) plant equipment on-site inspections and field evaluation of property to identify environmental related issues or assure such issues, are not encountered.

While gaining an understanding of complex regulatory requirements, he has succeeded in providing quality professional environmental compliance assistance to industrial and private facility owners. He has developed on-site Clean Air Act and Clean Water Act compliance assurance procedures and recordkeeping systems to demonstrate immediate and continuous compliance with facility permits and related regulations.

Mr. Stehle serves as lead field evaluator to assess secondary containment system characteristics, and develop workable compliance related recordkeeping and plans. He has served in the lead role on over 30 individual Clean Water Act Oil Spill Control and Countermeasures Plans.

In addition, Mr. Stehle has served as field investigator for multiple individual Environmental Site Assessments (ASTM Phase I ESA's). He has completed record reviews and evaluated known or recognized environmental conditions. He has prepared mining permit applications, evaluated closure and post closure costs and financial assurance mechanisms, and coordinated public notices and communication with regulatory agencies.

RODNEY K. BREUER, P.E.

Principal

EDUCATION

University of Missouri at Rolla, BS
Civil Engineering, 1979

University of Missouri at Rolla, MS
Civil Engineering, 1980

REGISTRATION

Registered Professional Civil

Engineer (Arkansas, Kansas, Missouri and Oklahoma)

PROFESSIONAL HISTORY

ECCL, Principal, Vice President, 1993 to Present

ENSCO, Senior Environmental Engineer, 1987 - 1993

Missouri Department of Natural Resources, Environmental
Engineer 1980 - 1987

EXPERIENCE

Mr. Breuer has over 35 years of experience in all areas of environmental engineering. He served as an environmental regulatory official in wastewater treatment, mining, and hazardous waste management. He managed all regulatory permitting for a national hazardous waste management company for six years including NPDES, solid waste, hazardous waste, stormwater, air pollution, and toxic substances.

His strong civil engineering background has been helpful in hundreds of environmental and design engineering projects as ECCI's principal civil engineer since 1993. In 1994, he was awarded Whirlpool Corporation's Silver Medal for leadership for his role in developing Clean Air Act procedures, which demonstrated compliance while providing broad operational flexibility for the manufacturing facility (30 acres under roof).

Mr. Breuer is experienced in complicated projects related to Clean Air Act requirements. Projects have included evaluation and selection of air pollution control technology systems, modeling of air toxics to demonstrate compliance with ambient concentration standards, and defining operational scenarios to achieve maximum flexibility while minimizing reporting and recordkeeping costs. Mr. Breuer's combined industry and government experience allows him to quickly identify the key issues related to margins and allow industry to work with regulatory programs to support the business goals. Mr. Breuer has provided engineering assistance for several large and complicated industrial sales and acquisitions.

US Army Pine Bluff Arsenal, Construction Certification, Pine Bluff, Arkansas: Certifying Professional Engineer for RCRA hazardous waste permitted systems. The Professional Engineer certifications assure systems have been constructed according to design specifications and permit requirements. Mr. Breuer also

served as the lead professional engineer for hazardous waste P.E. Certifications of Closure of those hazardous waste handling and treatment systems used to eliminate historical stockpiles of chemical weapons.

Wastewater Treatment System Design, multiple locations: Mr. Breuer has served as the lead design engineer for multiple community waste treatment systems and multiple specialized industrial pretreatment, and treatment processes.

Clean Air Act Permitting and Compliance: Mr. Breuer has served as the lead engineer on over 300 Clean Air Act permitting and compliance projects, including surface coating processes, wood products industries from large commercial mills to production of specialty wall boards, mineral processing facilities, metal parts manufacturers, appliance manufacturers, chemical process facilities, boat and other fiberglass products manufacturing, wind turbine and wind tower manufacturing, food processing, proppant manufacturing, and steel pipe manufacturers.

Stormwater Pollution Prevention Plans and compliance systems for a broad range of manufacturers, including wood products manufacturing, food products and processing, hazardous waste management facilities, mining, fuel storage and distribution, oil and gas related field services, metal products manufacturing (electric motors, wind turbines, trailers, boat and fiberglass products), consumer product manufacturers, major medical facilities and metal piping manufacturers, and rocket fuel handling and loading facilities.

Cargill, Spill Prevention, Control & Countermeasure (SPCC) Plans, USA: Certifying Professional Engineer on SPCC Plans for 53 animal feed processing facilities in 30 states.

Clean Harbors El Dorado, LLC, Environmental Engineering Assistance, El Dorado, Arkansas: Certifying Professional Engineer for multiple hazardous waste storage tank closures and on multiple RCRA Part B hazardous waste permit application, and manager of air permitting assistance.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal landfills and solid waste disposal facilities

SWID: Solid Waste Illegal Dumps Database.

A review of the SWID list, as provided by EDR, and dated 04/26/2026 has revealed that there is 1 SWID site within approximately 0.5 miles of the target property.

Other Ascertainable Records

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 11/21/2025 has revealed that there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 11/21/2025 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

Memo: I am reporting an unusual operating condition on the Diesel line at this facility. I was called late yesterday by Billy Rowlett that Diesel would not pump, this morning checked line, line will not hold pressure with check valve closed or when a silver bullet is installed to isolate line. Line is SHUT DOWN We will return on Monday to investigate [Last modified by Eric Raglin on 1/20/2026 8:50 AM] In response to the email regarding the unusual operating condition on the diesel line at this location it was found the sub unit had an internal crack in the line side of the housing allowing the line to bleed to zero and not hold pressure even when a silver bullet was installed, said unit head has been replaced and all system is good [Last modified by Eric Raglin on 2/2/2026 3:53 PM]

Leak Damage: SUSPECTED SLIGHT CONTAMINATION.
Memo: METHOD OF DISCOVERY: SITE AUDIT FOR PROPERTY TRANSFER. INVENTORY RECORDS ARE BEING REVIEWED. REPORT AND COPIES OF ASSESSMENTS WILL BE FORWARDED TO ADPC&E. 10/25/89 GEOLOGIST MARK SIMPSON AND INSPECTORS GARNER AND ERNST VISITED THIS SITE TO VERIFY INFORMATION RECEIVED FROM CHEVRON REGARDING POSSIBLE LEAK. PRIMARY COMMENT SEEMED TO CONCERN ONE OF THE MONITORING WELLS ON SITE. THIS WELL, APPARENTLY ARTESIAN IN NATURE, WAS FREELY FLOWING AND THE WATER HAD A SLIGHTLY OILY SHEEN. SIMPSON RECOMMENDED TO CHEVRON THAT THEY CAP THIS WELL AND CLOSE IT OFF. TIM JOHNSON, CHEVRON, AGREED VIA TELEPHONE CONVERSATION. 5/03/91 C. THOMPSON NO FURTHER ACTION REQUIRED AT THIS SITE. (SEE FILE FOR LETTER.)

Memo: ON 05/03/2023 INSPECTOR ERIC RAGLIN WAS CHECKING ON FACILITY AFTER IT WAS DAMAGED BY A TORNADO ON 03/31/2023. POWER WAS STILL OUT AT THIS LOCATION. UPON CHECKING GROUND WATER WELLS, APPROXIMATELY 3/4 INCH OF PRODUCT WAS DISCOVERED ON THE SOUTHEAST CORNER DOWN END OF THE TANKPIT. MONITORING IS NOT BEING DONE DUE TO STORM DAMAGE AND NO POWER TO THE PROPERTY. THIS WILL HAVE TO BE INVESTIGATED BY THE RESPONSIBLE PARTY TO DETERMINE THE SOURCE OF THE PRODUCT. [Last modified by Eric Raglin on 5/3/2023 3:21 PM] FILE REFERRED TO JAY RICH FOR FURTHER REVIEW. [Last modified by Randy Beard on 8/23/2023 3:22 PM]

Memo: A TANK CLOSURE REPORT WAS RECIEVER ON 1/15/2014 FROM ARKANSAS TESTING SERVICES INC. FOR A 1000 GALLON USED OIL TANK AT THIS LOCATION. THE TANK WAS CLOED IN PLACE ON 1/18/2014 AND SOIL SAMPLES WERE TAKEN ON 1/22/2014. THE SOIL SAMPLES RESULTS EXCEEDED ADEQ-RST TPH SOIL GUIDELINES. THE CASE WAS REFERRED TO RST TECHNICAL BRANCH ON 1/17/2014 FOR FURTHER REVIEW. [MORGANR 1/17/2014 9:33:58 AM]. FACILITY REFERRED TO TECHNICAL BRANCH ON 1-17-14 FOR FURTHER REVIEW BASED ON ANALYTICAL RESULTS OF CLOSURE. [SMCDUFFIE 1/17/2014 10:45:24 AM]. Case file assigned to D. Frazier on 01/21/14. [frazier 1/22/2014 1:33:21 PM]. Site reconnaissance conducted on 02/13/14. Preliminary Assessment completed on 02/21/14 recommending investigation in accordance with 40CFR280.65. Site Assessment Work Plan requested on 02/26/14. [frazier 3/6/2014 2:07:57 PM]. At the direction of the RSTD Chief on 04/07/14, Technical Branch will suspend LUST responses until UST closure of waste oil tank is completed, under the direction of the Enforcement Compliance Branch. [frazier 5/8/2014 3:06:57 PM]. TRUST FUND ELIGIBLE. LETTER DATED 05/23/14. [PAES 5/27/2014 9:13:03 AM]. Site Assessment Work Plan received on 05/27/14. Work plan revisions requested on 06/03/14 via email. [frazier 6/6/2014 3:45:24 PM]. Revised Site Assessment Work Plan received on 06/12/14, and approved on 06/24/14. [frazier 6/30/2014 9:35:46 AM]. Site Assessment Report received on 9/12/14. Change Order #1 to conduct one additional sampling event was approved on 10/22/14. [frazier 10/24/2014 2:01:26 PM]. Additional Sampling Report received on 11/20/14. Exposure Assessment completed on 11/21/14 finding no regulatory concern. Request for Monitoring Well Decommissioning Work Plan issued on 12/01/14. [frazier 1/5/2015 10:58:19 AM]. Monitoring Well Decommissioning Work Plan received on 12/29/14 and approved on

Memo: On behalf of PetroPlus, LLC I am reporting an un-usual operating condition at Store #1040 located at 10100 Rodney Parham Road, Little Rock, Arkansas 72207 Facility ID# 60000942 premium ust tank #3. On August 24, 2023 the ATG detected a high water alarm. A technician was sent to look at this issue and after removing the water approx.. 1.3 inches the water returned on August 25, 2023. PetroPlus, LLC requested Ar. Testing perform a tank test to determine is a leak was occurring. Ar. Testing performed a tank test on August 28, 2023 and the test passed, but the tank continues to take in water. PetroPlus, LLC is continuing to investigate this issue and is trying to get a company scheduled to put a camera in the tank and see if they can determine if/where a leak might be occurring. This premium tank #3 is not releasing gasoline into the environment, but water is leaking into the tank from a yet unknown location. The premium tank #3 is currently dis-abled in the ATG and the breaker for the sub-unit is off to isolate this tank until a cause of the IN Leak can be determined Once a camera test has been scheduled we will notify you with a schedule of testing and proceed from that point forward. If you have any questions or need additional information please feel free to contact myself, Jim Cheevers or Terry Bishop with DSE at any time. Regards, Danny [Last modified by Eric Raglin on 9/1/2023 11:27 AM]

Complaint Site Disposition Description: Referred to other Agency
Comments: In Little Rock on the 10000 block of Rodney Parham on the south side of the street, there is a tent city. These people have brought in trash, mattresses, etc and are using, to the best of my knowledge, Grassy Flat Creek as their discharge point for urine and feces and whatever else. I have talked to City of Little Rock and they seem to be passive in their handling. This needs to be cleaned up and these people need to be stopped if they are polluting this creek!! Some of their encampment can not be seen from the street as they camp on the creek bank. Alan Keith Merritt P.E. 4806. Pleasant

Count: 0 records.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/26/2026	Source: EPA
Date Data Arrived at EDR: 04/01/2026	Telephone: N/A
Date Made Active in Reports: 04/21/2026	Last EDR Contact: 07/01/2026
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/05/2026
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2026	Source: EPA
Date Data Arrived at EDR: 04/01/2026	Telephone: N/A
Date Made Active in Reports: 04/21/2026	Last EDR Contact: 07/01/2026
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/05/2026
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
05119C0319G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
05119C0318G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
PINNACLE MOUNTAIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
Not Reported	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Leadvale

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5
2	7 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5
3	16 inches	48 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5
4	48 inches	72 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 0.42	Max: 5.5 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

The map is a topographic representation of the area surrounding the Arkansas Valley Regional Water Treatment Plant. The plant itself is highlighted with a yellow shaded area and a green star. Concentric circles are drawn around the plant, likely representing different levels of impact or service. The map includes various roads, such as Fairway Dr, N Rodney Parham Rd, N Bluffman Rd, and N Shackleford Rd. It also shows contour lines indicating elevation, and several water bodies are depicted in blue. An inset map in the bottom right corner provides a broader geographical context, showing the location of the plant within the state of Arkansas.

-
- A horizontal number line representing a distance of 1 mile. It has tick marks at 0, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, and 1 Miles. The segment between 0 and $\frac{1}{4}$ is highlighted in yellow.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ECCI were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Contact: Jeremy Stehle

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ECCI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0E79-4E25-BA9D

PO # 4509-3024

Project Breckenridge Lot

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0E79-4E25-BA9D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

ECCI (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

Phase I Owner/Operator Questionnaire

Description of Site -
Address

Breckenridge Lot

10702 Breckenridge Drive

Little Rock, Arkansas

ECCI Job
Number:

4509-3024

Note: IF OCCUPANT IS DIFFERENT THAN OWNER, THEN BOTH THE MAJOR OCCUPANTS AND THE OWNER MUST COMPLETE SEPARATE QUESTIONNAIRES.

PLEASE RESPOND IN GOOD FAITH TO THE EXTENT OF YOUR ACTUAL KNOWLEDGE.

	QUESTION	OWNER/OCCUPANT RESPONSE			COMMENTS
1.	<u>Current Use</u> – Is the property or any adjoining property used for an industrial use? If yes, please explain:	Yes	☒ No	Unknown	Further inquiry would be needed if the industrial use concerned the manufacture of paints, oils, solvents, and other chemicals, but not if the use concerned the storage of inert goods in containers.
2.	<u>Past Use</u> – To the best of your knowledge, has the property or any adjoining property been used for an industrial use in the past? If yes, please explain:	Yes	☒ No	Unknown	Are there any indications present on the property that would cause one to suspect an industrial use may once has existed on the site? Old buildings, pipes, containers, or other debris are indicators of previous industrial use of the site.
3.	<u>Current Use</u> – Is the property or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, and disposal, processing or recycling facility? If yes, please explain:	Yes	☒ No	Unknown	Gasoline stations, motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal, processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.
4.	<u>Past Use</u> – To the best of your knowledge, has the property or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility dry cleaners,	Yes	☒ No	Unknown	Gasoline stations, , motor vehicle repair facilities, dry cleaners, photo developing laboratories, commercial printing facilities, junkyards or landfills, and waste treatment storage, disposal,

	photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility? If yes, please explain:				processing, or recycling facilities all involve the use of hazardous substances or petroleum products and therefore require further inquiry concerning the possible release of such substances.
5.	Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints or other chemicals in individual containers of greater than 5 gallons in volume of 50 gallons in the aggregate, stored on or used at the property or at the facility?	Yes	☒ No	Unknown	If the answer to this question is "yes," list the items and the location(s) where they are stored. If unfamiliar with the contents of any container located on the site, the question must be answered "yes" until the materials are identified.
If the answer is yes, complete the following					
Item		Storage Location		Evidence of Leakage? Yes or No	
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallons) or sacks of chemicals located on the property or at the facility?	Yes	☒ No	Unknown	Chemicals are frequently stored in 55-gallon drums and dry chemicals are often stored in 20-pound sacks.
If the answer is yes, complete the following					
Item		Storage Location		Evidence of Leakage? Yes or No	
7.	Has fill dirt been brought onto the property that originated from a contaminated site or that is of an unknown origin? If yes, please explain:	Yes	☒ No	Unknown	If any structures have been demolished on the property, investigate whether the structures were demolished in place and fill dirt compacted over them because such demolition debris may contain asbestos or hazardous substances.
8.	Are there currently, or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal? If yes, please explain:	Yes	☒ No	Unknown	The presence of pits, ponds, or lagoons, together with waste treatment or waste disposal may indicate contaminated property.
9.	Is there currently, or to the best of your knowledge, has there been previously, any stained soil on the property? If yes, please explain:	Yes	☒ No	Unknown	Stained soils are frequently associated with contamination and often are an indication of either current or previous leakage associated with piping and liquid storage containers.
10.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (aboveground or underground) located on the property? If yes, please explain:	Yes	☒ No	Unknown	Tanks are often used to store heating fuels, chemicals, and petroleum products.
11.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the property or adjacent to	Yes	☒ No	Unknown	Vent or fill pipes often signal the current or previous existence of underground storage tanks. Additionally, consider the presence of any asphalt or concrete patching that

	any structure located on the property? If yes, please explain:				would indicate the possibility of previous underground storage tank removal.
12.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains or walls located within the facility that are stained by substances other than water or are emitting foul odors? If yes, please explain:	Yes	No	Unknown	Stains (other than water stains) or foul odors may indicate leaks of hazardous substances. Floor drains located within a building adjacent to hazardous substance storage areas or connected to an onsite disposal system (e.g., septic system) present a potential source of subsurface discharge of contaminants.
13.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water systems or has the well been designated as contaminated by any government environmental/health agency? If yes, please explain:	Yes	No	Unknown	If the system is private, it probably has been tested for contamination or evidence that it is free from contamination, and the results of any such tests should be produced by the owner or occupant of the well.
14.	Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property? If yes, please explain:	Yes	No	Unknown	If the answer to this question is "yes," further inquiry is needed.
15.	Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property? If yes, please explain:	Yes	No	Unknown	Consider whether any environmental professionals familiar with hazardous substances or petroleum products have observed or determined the contamination existed on the property.
16.	Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property. If yes, please explain:	Yes	No	Unknown	As part of further inquiry, copies of reasonably ascertainable prior environmental site assessments of the property or any portion thereof should be obtained and examined to determine whether further action or inquiry is necessary in connection with any environmental problems raised by a prior environmental site assessment.
17.	Does the owner or occupant of the property know if any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property? If yes, please explain:	Yes	No	Unknown	This question is to be answered by the owner or occupant based upon their respective actual knowledge and review of reasonably ascertainable records in their possession.
18.	Does the property discharge wastewater on or adjacent to the property into a sanitary sewer system? If yes, please explain:	Yes	No	Unknown	The owner and occupant should be asked where the drain traps lead and the purpose of drainage pipes at the facility. Wastewater does not include a reference to domestic sewage or stormwater. Oil/water separators are

					most often found outside a building under a manhole and require routine servicing to remove oil. Oil/water separators are usually in restaurants, repair garages, and service stations.
19.	To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property? If yes, please explain:	Yes	No	Unknown	Past waste disposal practices should be examined because these may have resulted in hazardous substances or petroleum products being released on the property. Does the property evidence any mounds or depressions that suggest a disposal site?
20.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs? If yes, please explain:	Yes	No	Unknown	Transformers, elevators and auto lifts are often run by hydraulically controlled systems containing PCBs. If inspection or maintenance records indicate that no releases have occurred or that regular, scheduled maintenance has taken place and the machinery does not appear to be damaged or leaking, no further inquiry is required.

You will most likely be contacted to meet with an ECCI employee in order to complete a site assessment. At the time of ECCI's site visit, it would most helpful if you could supply information on the following (if applicable):

Existing Information		Check All That Apply to Your Facility	
		Yes	No
1.	Previous Environmental Site Assessment Reports	☐	☒
2.	Previous Environmental Audit Reports	☐	☒
3.	Registration for Tanks	☐	☒
4.	MSDS Sheets	☐	☒
5.	Community Right-to-Know Plan	☐	☒
6.	Safety Plans	☐	☒
7.	Preparedness and Prevention Plans	☐	☒
8.	Spill Prevention, Countermeasure and Control Plans	☐	☒
9.	Previous Geologic/Hydrogeologic Reports for Site	☐	☒
10.	Notices or Correspondence from Any Government Agency Regarding Environmental Violations	☐	☒
11.	Hazardous Waste Generator Notices or Reports	☐	☒

HISTORICAL INFORMATION

1. How long have you owned/occupied the property? 7 months
2. Who was the previous owner of the property and how long did they own the property? N/A
3. What do you use the property for? Investment
4. To your knowledge, what have the historical uses of the property been: single family residence
5. Are you aware of any environmental liens or notices of violations from any environmental agencies?
No

SITE OPERATIONS

1. What type of heating systems are used on the site (circle all that apply)
Natural gas Petroleum fuel Electric Other N/A
2. What is your source of drinking water/process water (circle all that apply)
Public supply Private well Surface water Other _____
3. Where is wastewater, or liquid waste, discharged? (circle all that apply)
Public sanitary sewer Septic system/cesspool Storm sewer Ground surface
Surface water Evaporation pond Other _____
4. List Waste Types and Disposal Method:
Solid Wastes: _____
Liquid Wastes: _____
Other Wastes: _____
5. Are any wastes or chemicals Discharged or Disposed on-site? (circle answer) YES NO
6. Any spills/releases of hazardous substances/petroleum products on site? YES NO

Phase I User Questionnaire

Description of Site - Address Breckenridge Lot
 10702 Breckenridge Drive
 Little Rock, Arkansas
 Breckenridge Lot
ECCI Job Number: 4509-3024

Note: User shall complete this questionnaire.

PLEASE RESPOND IN GOOD FAITH TO THE EXTENT OF YOUR ACTUAL KNOWLEDGE.

ASTM & HISTORICAL INFORMATION

1. Who was the previous owner of the property and how long did they own the property? _____

1/20/26 - Present

ACCESS GROUP 5/30/23 - 1/20/26

2. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? No

Note 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and Activity Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that

are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? _____

No

4. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NA/ Residential

5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Purchase price reflects the fair market value

6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

- a. Do you know the past uses of the property? Yes ☐ No ☒

If yes, please describe: _____

- b. Do you know of specific chemicals that are present or once were present at the property?

Yes ☐ No ☒

If yes, please describe: _____

- c. Do you know of spills or other chemical releases that have taken place at the property? Yes

☐ No ☒

If yes, please describe: _____

d. Do you know of any environmental cleanups that have taken place at the property? Yes ☐

No ☒

If yes, please describe: _____

7. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?

No
