

**OFFICE OF THE CITY MANAGER
LITTLE ROCK, ARKANSAS**

BOARD OF DIRECTORS COMMUNICATION

July 7, 2026, AGENDA

Subject:	Action Required:	Approved By:
<p>To authorize the Mayor to enter into an agreement with Morrow Energy and Enbridge Holdings (Tomorrow RNG), LLC joint venture through Little Rock Renewables, LLC to plan, design, develop and maintain a Landfill Gas-to-Energy system at the City landfill.</p> <p>Submitted By: Department of Public Works: Solid Waste Services Division</p>	<p>Ordinance √ Resolution</p>	<p>Delphone Hubbard City Manager</p>
SYNOPSIS	<p>A resolution to authorize the Mayor to enter into a an agreement with the Morrow Energy and Enbridge Holdings (Tomorrow RNG), LLC joint venture through Little Rock Renewables, LLC to plan, design, develop, and maintain a Landfill Gas-to-Energy system for the treatment and enrichment of landfill gas into renewable natural gas ('RNG') for the purposes of selling said RNG and associated environmental credits.</p>	
FISCAL IMPACT	<p>The city will receive royalty payments based on gross revenue from the sales of RNG, Renewable Identification Numbers ("RINs"), long-term gas contracts or CO2 from the project.</p>	
RECOMMENDATION	<p>Adopt the Resolution.</p>	
BACKGROUND	<p>The landfill produces methane-rich gas as part of its normal operation. To maintain compliance with State and Federal regulations, this gas must be collected via wells installed in the Landfill and then either combusted or sold. The previous Landfill Gas-to-Energy contract with Johnson Controls, Inc. (JCI) approved in Resolution 12,379 expired in 2021. This new contract would generate revenue from the sale of gas and reduce future expenses by externalizing the cost of new gas-wells.</p> <p>The City conducted a formal Request for Proposals ("RFP") (Bid #169203) in January 2025 to identify and select a new partner for</p>	

**BACKGROUND
CONTINUED**

a landfill gas-to-energy project. The City received seven submissions that were evaluated by an evaluation committee with Morrow Energy's submission determined to be the best proposal for the City of Little Rock.

Further, this project is in alignment with the Board of Director's approved Sustainability Action Plan Waste Objective 3, Strategy 3A.
